KOMPAN profile: Great playgrounds are based on knowledge

On the supporting pillars of health, learning and social inclusion as the environmentally conscious global market leader

Founded in 1970 in Odense, Denmark, KOMPAN is today the world's leading manufacturer of playground equipment. Presently, KOMPAN has offices in more than 40 countries in Europe, North America, Asia-Pacific and the Middle East and ships its high quality playground equipment from the production and logistics center in the Czech Republic worldwide.

People play by nature. For children, playing means having fun, learning as well as social and physical activity. Basically, nothing changes for adults - play is the key to a long, happy life.

With our inventions, where we always search for best solutions for playgrounds and sports & fitness facilities, we have set new standards worldwide for play, fun and movement.

So we want to redeem our commitment: We want to promote health and satisfaction around the world by encouraging people to play more and be more active.

We start from our own proven approach, because at KOMPAN, product development is based on in-depth research, extensive user involvement, and close collaboration with professionals within the KOMPAN Play Institute. On this basis, we orientate ourselves to requirements of users and customers and tailor our products to suit. The result is play and activity devices that motivate people to play more, be more physically active, learn more and socialize, regardless of their age and abilities.

Safety always comes first for us. By choosing highest quality materials, we can develop extremely durable solutions that withstand the ravages of time and weather. We consciously pay attention to aesthetic design - this applies to the products themselves. On the other hand, we also pay attention to how our devices fit into architecture, landscape and nature of the environment.

Digital technologies are now omnipresent and are changing our lives more and more. This also has an effect on playing: why, how and where we play and are physically active - alone, as a family and in public space. We have always driven forward innovative developments and are also facing up to this change - in order to continue to be a pioneer within the industry and to reinvent playing because we all benefit from this.

As the world's leading manufacturer of high-quality playground equipment, the company has not only won many important design awards, KOMPAN is also delighted highest appreciation on the part of customers. These are public authorities, schools, childcare facilities, event and theme parks, housing associations, catering outlets and other facilities that know that better playgrounds are not only fun and exciting, but also based on a sound knowledge of what to do really great playground. KOMPAN playgrounds are much more than just scaffolding and racks because they are designed with a view to a bigger goal: promoting child development through games.

PRESSEINFORMATION

In addition to the promotion of health and learning, KOMPAN vision also includes aspects of man and nature. It is an entrepreneurial goal anchored here to do business in such a way that the well-being of man and nature is not only respected, but positively promoted. The entire product lifecycle is aligned to this goal, and materials and production processes are continuously being optimized in order to further promote sustainability. As a result, KOMPAN products can be easily disassembled into their component parts at the end of their lifecycle and then responsibly recycled or disposed. In addition to FSC-certified wood, recyclable steel and aluminum are used. Furthermore, KOMPAN has switched widespread HDPE panels to EcoCore™: a very durable, environmentally friendly material that is not unyclable, but also made from a core made from 100% recycled material.

A popular product range of KOMPAN is our Robinia range of 100% organic robinia wood. The naturally grown robinia logs serve as a source of inspiration for our new and unique outdoor robinia play equipment. Through a unique, holistic approach to design a play area, the Organic Robinia products promote children's interest in nature and bring an understanding of nature into their lives. The new Robinia castles and ships give each park something royal and invite you to a royal game day for the whole family.

KOMPAN Sport & Fitness is a versatile and comprehensive range of outdoor exercise equipment designed to encourage playful training and teamwork with a focus on health, fun, challenge and creativity. A physical activity that forgets that you are actually training.

This is sport for everyone. Focused on achieving personal goals and social engagement.

KOMPAN - Let's play!
